➤ EXPERIENCE

DEVOPS - GLOBANT ARGENTINA

2023/11 - Today

Implementing tech stack for Grafana, Loki, Mimir, Tempo and Otel, hosted in AKS, using helm charts and Azure pipelines for deployment. nginx as ingress controller, JFrog as container image, Azure SQL server & database. Azure OpenAI multi region project, spread in different subscriptions integrated to consume a unique API management instance, integrated with onprem services. Azure CosmosDB as main db, storage accounts, keyvaults, Azure functions, log analytics and other services are being used to build this solution's infra.

AZURE DEVOPS ACCENTURE S.A., ARGENTINA

2019/06 - 2023/10

Azure DevOps tool site administrator. Managing and solving issues related to boards, pipelines, artifacts, repos, permissions of users/groups, installing of agents on build or release VMs, pool managing and full CI/CD cycle, from code pushing to successful deployment. All this tasks, given to users from around the globe, mostly from Americas, due to our similar timezone. I also have experience on resource creation with iAc such as terraform, combined with aks knowledge, mostly based on azure cloud

COBOL DEV & ANALYST ACCENTURE S.A., ARGENTINA

2014/09 - 2019/06

COBOL developer and analyst, part of a software factory oriented to maintenance of already in existence system and implementation of new features, related to a gas company billing.
